- Environment and resource management

Promoting sustainability in the textile and garment industry in Asia (FABRIC)

Organisational set-up

GIZ FABRIC and country level initiatives

Main regional hub Phnom Penh Textile cluster programme Bangladesh

Environment hub

Dhaka

Textile cluster programme Pakistan

Country focal teams

SMART Myanmar (sequa)

Implemented
by
GIZ Septiate Geoffschaft
For Internationals
Zusammererbeit (SIZ) Stabili

International / regional partners

Textilbündnis Certificat. agencies

ZDHC

Brands

University networks

Authorities

Country level

Ministries

Social and OSH authorities

Environ. authorities

Sector associations

Buyers` fora

Service providers

NGO

Labour associations

Local universities/ educ. inst.

Promoting sustainability in the textile and garment industry in Asia (FABRIC)

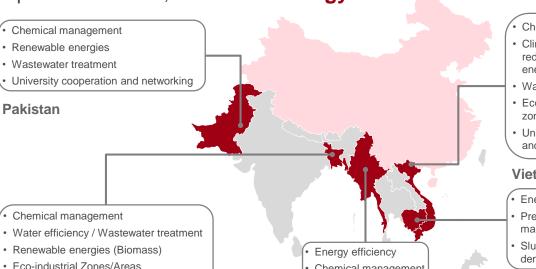

Chemical management

Waste water treatment

Myanmar

Overall, the environmental component of FABRIC focuses on the topics chemicals, water and energy.

- Chemical management
- · Climate Impact (GHG reduction, renewable energies)
- Wastewater treatment
- · Eco-industrial zone/areas
- University cooperation and networking

Vietnam

- Energy efficiency
- Pre-consumer waste management
- Sludge management in denim washing

Cambodia

Fields of work (Environment)

- Exchange on efficient environmental governance and environmental regulations
- · Introduction of circular economy (CE) concepts
- · Integration of certification and assessment approaches & tools
- Building regional competences at factory and business intermediary level
- Embedding of environmental and CE topics in curricula of local educational institutions

Bangladesh

University cooperation and networking
